WELLESLEY COLLEGE

Wellesley, Massachusetts

FOUNDATION AND PURPOSE

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees, and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed by usage or statute to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G. Houghton and Mr. Clement S. Houghton as a memorial to their father, Mr. William S. Houghton, a trustee of the College from 1880 to his death in 1894. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday, the singing is led by a trained choir of students under the direction of the department of music.

The Wellesley College Christian Association, organized to foster religious life, and interest in social reforms and in home and foreign service holds meetings for prayer and religious instruction.

The department of Biblical History affords the systematic study of the Bible required of all students.

ADMISSION

Students may qualify for admission to Wellesley College as candidates for the bachelor of arts degree either as members of the freshman class on the presentation of satisfactory entrance credentials, including school records and entrance examinations, or as students with advanced standing with records of accomplishment in other colleges. Since the size of the student body is limited to about fifteen hundred students, candidates in both groups are chosen very carefully in order of the excellence of their credentials including testimonials concerning health, character, and scholarship. A student is not admitted, except in very unusual cases, who is not at least sixteen years of age.

If a student is unable to meet the academic standard prescribed in College or if she does not conduct herself in accordance with the spirit as well as the letter of the regulations which are necessitated by the interests of a community of students and faculty organized for purposes of study, she may be required to withdraw from the College.

Application for Admission

Forms of application will be furnished on request. An application fee of \$10 is required of all applicants and no registration is recorded until the fee is received. If the candidate enters College, the fee is credited on the first semester's bill. If the candidate cancels her registration or fails to qualify for admission, the fee is not refunded but it may be transferred to apply to a later year if the request for the transfer is received before November 1 of the year for which the candidate was registered to enter College. If a candidate's credentials are not received by July 15 and no request to transfer the application is filed by November 1, the name of the candidate will be automatically dropped from the list.

The Board of Admission cannot usually consider applications received later than May 1 of the year in which admission is sought. The date of application is used as a basis for assigning rooms to accepted candidates. It is not considered in the selection of candidates.

All communications concerning admission should be addressed to the Secretary of the Board of Admission, Wellesley College, Wellesley, Massachusetts.

Health Certificates

A report from the applicant's physician showing that she is organically sound and in good health, together with a certificate of recent vaccination, must be filed with the Secretary of the Board of Admission before June 1 of the year in which admission is sought. Blank forms for these health reports will be sent to each registered applicant in the spring previous to her proposed entrance to College. Before a candidate is formally accepted she is given a thorough physical examination in the opening week of College under the direction of the college medical staff and the Department

of Physical Education. The College reserves the right to reject any candidate who, in the opinion of the college physicians, is not fitted for work in the college community.

Admission to the Freshman Class

Since the College believes that no one criterion is satisfactory as a basis of choosing the members of the freshman class, applicants must present four kinds of evidence of fitness for college work: (1) records submitted by the secondary school on forms furnished by the Board of Admission, giving the report of subjects studied and school grades for the entire secondary school course; (2) a full statement from the school principal concerning the applicant's intellectual ability, power of application, special interests, circumstances, and character; (3) entrance examinations in subjects offered for admission; (4) the Scholastic Aptitude Test of the College Entrance Examination Board. In all possible cases this information is supplemented by a personal conference between the candidate and a representative of the Board of Admission.

In choosing students the Board of Admission considers the gradual growth of power, interests in special fields of work, and seriousness of purpose.

The meeting of the Board of Admission for considering the complete records of candidates and selecting the members of the freshman class occurs about the middle of July. Candidates will usually be notified about admission by July 25.

Admission Examinations

All candidates for the freshman class are required to take the Scholastic Aptitude Test given by the College Entrance Examination Board during the week of the other College Board Examinations. This test requires no special preparation and is in the nature of a test of ability. It should be taken with the final subject examinations and need not be repeated. For information about applying for this examination candidates should consult the statement about the College Entrance Examination Board on pages 23-25.)

In addition to the Scholastic Aptitude Test all candidates must take subject examinations according to one of the two plans indicated below as Plan A and Plan B.

Plan A. This plan calls for examinations in all subjects offered for admission credit, either the examinations of the College Entrance Examination Board, Regents examinations of New York State or, for foreign students, the matriculation examinations of a foreign university. Plan A is used by less than a third of the candidates for admission to Wellesley College.

Examinations under this plan may be taken in two or more successive years. Students are advised to take final examinations in subjects which

they expect to continue in College. Either the comprehensive or the ordinary examinations of the College Entrance Examination Board may be used.

Entrance examinations in Biblical History, Harmony, Music Appreciation and Applied Music will be conducted by Wellesley College. Applications for these examinations must be made to the Secretary to the Board of Admission of Wellesley College by May 1.

For detailed information concerning the application for the examinations of the College Entrance Examination Board candidates should consult the statement on pages 23-25 under the caption "Examinations of the College Entrance Examination Board."

Plan B. Under Plan B four examinations of the College Entrance Examination Board are considered in connection with the school record to determine a candidate's admission. One examination subject must be chosen from each of the following groups: (1) English or History; (2) a foreign language; (3) Mathematics, Physics or Chemistry; (4) a fourth subject designated by the applicant from the list of subjects offered for admission in which the College Entrance Examination Board offers examinations. At least two examinations must be based on subjects studied more than two years.

In History and Science the examination is based on one unit only. In Mathematics candidates may take either Mathematics A (Algebra) or Mathematics Cp. 3 (Algebra and Plane Geometry) or Mathematics H (Trigonometry and Solid Geometry). In Latin if students have passed a preliminary examination covering three units of Latin, they may take Latin H or K (fourth year Latin). In all subjects candidates are expected to take the most advanced examination for which their preparation has fitted them.

The Board of Admission must give its permission, based upon the evidence submitted by the school, before the applicant may take the examinations. The comprehensive examinations set by the College Entrance Examination Board are judged by readers appointed by this Board, and are forwarded to the College for final decision by the Board of Admission.

Under Plan B the candidate, if admitted to College, will be admitted free from all conditions. Failure to meet completely the standard in either kind of evidence required will not necessarily involve rejection of the applicant; the Board may accept unusual excellence in one part of the credentials submitted as offsetting unsatisfactory evidence or even failure in another part. If the candidate fails of admission she may be permitted to take examinations under Plan A or Plan B the following June.

The four examinations must be taken in one examination season in June in the examination centres provided by the College Entrance Examination Board. Full details about applying for these examinations will be found on pages 23-25 under the caption "Examinations of the College Entrance Examination Board."

Dates on which Admission Credentials are Due

The following credentials must be in the hands of the Board of Admission before July 15 of the year in which entrance is desired:

Examinations of the College Entrance Examination Board

June Examinations.—The College Entrance Examination Board will hold examinations in June 1931 at nearly 400 points in the United States and abroad.

A list of places at which examinations will be held will be published about March 1, 1931. Requests that the examinations be held at particular points should be transmitted to the Secretary of the College Entrance Examination Board not later than February 1, 1931.

Detailed definitions of the requirements in all examination subjects are given in a circular of information published annually about December 1. Upon request to the Secretary of the College Entrance Examination Board a single copy of this document will be sent to any teacher without charge. In general, there will be a charge of twenty-five cents, which may be remitted in postage.

All candidates wishing to take these examinations must make application by mail to the Secretary of the College Entrance Examination Board, 431 West 117th Street, New York City. Blank forms for this purpose will be mailed by the Secretary of the College Entrance Examination Board to any teacher or candidate upon request by mail.

The applications and fees of all candidates who wish to take the examinations in June 1931 should reach the Secretary of the College Entrance

Examination Board not later than the dates specified in the following schedule:

FOR EXAMINATION CENTRES:

In the United States east of the Mississippi River or on the Mississippi	May 25, 1931
In the United States west of the Mississippi River or in Canada	May 18, 1931
Outside of the United States and Canada, except in Asia.	May 4, 1931
In China or elsewhere in the Orient.....	April 20, 1931

Every application for examination which reaches the Secretary of the Board on or before the scheduled date should be accompanied by an examination fee of \$10.00, which may be remitted by postal order, express order, or draft on New York to the order of the College Entrance Examination Board.

An application which reaches the Secretary later than the scheduled date will be accepted only upon payment of \$5.00 in addition to the regular examination fee.

When a candidate has failed to obtain the required blank form of application the regular examination fee will be accepted if the fee arrive not later than the date specified above and if it be accompanied by a memorandum with the name and address of the candidate, the exact examination centre selected, and a list of the subjects in which the candidate is to take the Board examinations.

Candidates who have failed to file applications for examination may be admitted by the supervisor to all examinations except the Scholastic Aptitude Test upon payment of a fee of \$5.00 in addition to the regular examination fee. Such candidates should present themselves at the beginning of the period of registration. They will receive from the supervisor blank forms of application which must be filled out and transmitted to the Secretary of the College Entrance Examination Board.

In order to exhibit their tickets of admission, to learn their examination numbers, and to obtain seats in the examination room, candidates should report for a morning examination at 8:45 and for an afternoon examination at 1:45. An examination will close for candidates admitted late at the same time as for other candidates. The examinations will be held in accordance with the time, Standard Time or Daylight Saving Time, observed in the local schools.

No candidate will be admitted to the Scholastic Aptitude Test late, that is, after 9:00 A.M.

The Scholastic Aptitude Test, which will be held on the morning of Saturday, June 20, 1931, may be taken upon the completion of the school course or at the end of the third year of secondary school work. Each candidate desiring to take this test, even though she is to take no other examination, must file with the Secretary of the College Entrance Exam-

ination Board the usual application for examination. Application blanks will be sent to any teacher or candidate upon request by mail to the Board. If the Scholastic Aptitude Test is taken in connection with other examinations no additional fee is required; if taken alone the fee is \$10.00.

A week or more in advance of the Scholastic Aptitude Test each candidate who is to take the test will receive a booklet containing, with explanations and instructions, a specimen test, the blank spaces of which are to be filled in by the candidate. In order to secure admission to the test the candidate must present not only her ticket of admission but also this booklet with the spaces filled in as requested. The supervisor will admit no candidate to the examination room without this booklet.

September Examinations.—The comprehensive examinations of the College Entrance Examination Board are offered in September at Wellesley College. Special permission to take these examinations must be obtained from the Board of Admission of Wellesley College, and requests should be entered by August 15. The September examinations are conducted primarily as final examinations for a limited number of promising students who have incurred only a slight failure in the June examinations under Plan A.

ance of Regents Examinations candidates are referred to the Board of Admission of Wellesley College.

Plan of Entrance Subjects

For admission to the freshman class a candidate must present fifteen units* of secondary school studies chosen according to the following plan:

Group I. Prescribed, 10 units:

English 3

Mathematics 3

Algebra 2

Plane Geometry 1

Latin 3

History 1

Foreign language 2

or

Science 2

or

Science 1 and a second unit of History 1 . . . 2

Group III. Free Electives, 3 units.

If the unrestricted electives are chosen from subjects other than those in the group of prescribed and restricted electives, candidates are advised to submit their plan to the Board of Admission by September 1 of the year previous to their proposed admission to college.

Definition of Requirements

The definitions of requirements in all subjects in which the College Entrance Examination Board offers examinations are based on the statements outlined by this Board. The complete statement of these requirements may be found in the pamphlet called *A Definition of Requirements* published annually by the College Entrance Examination Board which may be obtained by sending twenty-five cents in stamps to the following address: College Entrance Examination Board, 431 West 117th Street, New York City.

In the following statement of requirements, the number enclosed in parentheses following the subject, indicates the number of units assigned to that subject, that is, the number of years with four or five recitations a week which will normally be required in the secondary school for adequate preparation in the subject.

*A unit represents a year's study of a subject with four or five class appointments a week or not less than the equivalent of 120 sixty-minute hours of classroom work, two hours of laboratory work counting as one hour of classroom work.

ENGLISH (3)

The study of English in school has two main objects: (1) command of correct and clear English, spoken and written; (2) ability to read with accuracy, intelligence, and appreciation, and the development of the habit of reading good literature with enjoyment.

Grammar and Composition.—English grammar should ordinarily be reviewed in the secondary school; and correct spelling and grammatical accuracy should be rigorously exacted in connection with all written work during the four years. The principles of English composition governing punctuation, the use of words, sentences, and paragraphs should be thoroughly mastered; and practice in composition, oral as well as written, should extend throughout the secondary school period. Written exercises may well comprise letter-writing, narration, description, and easy exposition and argument. It is advisable that subjects for this work be taken from the student's personal experience, general knowledge, and studies other than English, as well as from her reading in literature. Finally, special instruction in language and composition should be accompanied by concerted effort of teachers in all branches to cultivate in the student the habit of using good English in her recitations and various exercises, whether oral or written.

To meet the requirement in Composition, there should be practice in writing equivalent to weekly themes the first two years, and fortnightly themes the last two years of the preparatory course. Themes should be accompanied by simple outlines. The following books are suggested: Scott and Denney's *Composition—Rhetoric*; Neal's *Thought Building in Composition*; Robins and Perkins' *Introduction to the Study of Rhetoric* supplemented by Herrick and Damon's *Composition and Rhetoric*; Shackford and Judson's *Composition—Rhetoric—Literature*; Manly and Rickert's *The Writing of English*.

Literature.—The second object is sought by means of the reading and study of a number of books, from which may be framed a progressive course in literature covering four years. The student should be trained in reading aloud and be encouraged to commit to memory notable passages both in verse and in prose. As an aid to literary appreciation, she is further advised to acquaint herself with the most important facts in the lives of the authors whose works she reads and with their place in literary history. A few of these books should be read with special care, greater stress being laid upon form and style, the exact meaning of words and phrases, and the understanding of allusions.

A list of the books recommended for reading and study and suggestions concerning preparation for the College Board examinations in English

will be found in a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

HISTORY (1, 2 or 3)

All applicants for admission are required to offer one unit in History. One or two additional units of History may be offered from the following: (1) American History (with or without Civil Government), (2) Ancient History, (3) English History, (4) European History. For suggestions about preparation in History and the scope of the College Board examinations candidates are referred to a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

MATHEMATICS (3 or 4)

In a document entitled "Definition of Requirements," published by the College Entrance Examination Board, will be found the description of the requirements.

Algebra.—The requirement is met by the course in Mathematics designated as A.

Plane Geometry.—The requirement is met by the course in Mathematics designated as C. If desired, the course designated as *cd* may be substituted.

Solid Geometry and Trigonometry.—The requirement is met by the courses in Mathematics designated as D and E.

LATIN (3 or 4)

4 Unit Requirement.—Candidates should be familiar with the forms and syntax of the language and possess a vocabulary sufficient to translate Latin into idiomatic English and English into correct Latin. They should also be able to translate at sight Latin prose and poetry of moderate difficulty and to read Latin prose and verse according to the Roman method of pronunciation with strict attention to vowel quantities. To attain such proficiency not less than five forty-minute periods a week for four years should be given to the study of Latin.

The following recommendations are made in respect to the reading:

(1) In the second year the early reading should be easy Latin which may be "made" or adapted Latin; not less than one half of this year should be devoted to the reading of selections from Cæsar. The reading for the year may also include easy selections from such authors as Aulus Gellius, Eutropius, Nepos, Phædrus, Quintus Curtius Rufus, and Valerius Maximus, or books of selections containing some of these together with authors of prose works.

(2) In the third year, if the reading be in prose, not less than one half should be devoted to the reading of selections from Cicero; the reading for the year may also include selections from such authors as Pliny, Sallust, and Livy, or books of selections containing these and other authors of prose works.

(3) In the fourth year, if the reading be in poetry, not less than one half should be devoted to the reading of selections from Vergil; and the reading for the year may also include selections from such works as the *Metamorphoses*, *Tristia*, *Heroides*, and *Fasti* of Ovid, or books of selections containing poems or extracts from Ovid or from other poets.

The examination paper will include passages of Latin prose and verse of varying degrees of difficulty for "comprehension" and translation, and passages for Latin composition for the candidates presenting three years of Latin, and for those presenting four years of Latin in one examination. Accompanying the different passages set upon the paper will be questions on forms, syntax, and the idioms of the language, as well as such questions on the subject-matter, literary and historical, as may fairly be asked.

Further information concerning the character of the examination in four units of Latin will be found in a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

3 Unit Requirement.—The course of study for the first two years is the same as for candidates offering four units of Latin for admission. In the third year either the prose authors or the poetry may be offered. Constant practice in Latin writing is essential. Suggestions for study will be found in the document referred to above.

SUGGESTIONS CONCERNING PREPARATION.—Exercises in translation at sight should begin in school with the first lessons in which Latin sentences of any length occur, and should continue throughout the course with sufficient frequency to insure correct methods of work on the part of the student. From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the translating that the student has to do. No translation, however, should be a mechanical metaphor, nor should it be a mere loose paraphrase. The full meaning of the passage to be translated, gathered in the way described above, should finally be expressed in clear and natural English.

It is of special importance that practice in writing easy Latin *at sight* should be continued *throughout the entire period of preparation* in connection with the reading of the Latin authors. In the last year special attention should be given to translating continuous English into Latin both in the prepared and sight work.

A written examination cannot test the ear or tongue, but proper instruction in any language will necessarily include the training of both. The school work in Latin, therefore, should include much reading aloud, writing from dictation, and translation from the teacher's reading. Learning suitable passages by heart is also very useful, and should be more practiced. The work in composition should give the student a better understanding of the Latin she is reading at the time, and greater facility in reading. The teachers of Latin in the preparatory schools are urged to insist upon the use of good English in translation.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college. Ability to read at sight easy French or German prose is of great advantage to all classical students.

FRENCH (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in a document entitled "Definition of Requirements," published by the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) Emphasis should be laid on the correct daily use of the spoken language in the class room, on the correct and intelligent reading of French and on direct composition, including the writing of short themes in French. (2) It is particularly urged that the reading be chosen *from nineteenth century writers of prose, verse, and drama*, and if possible from more than five authors. (3) French being the language used in the class room in College, students are expected to understand it when spoken by the instructor in the class room, and to be able to answer in French when asked questions on their work and reading.

The texts suggested are:—(1) For the two unit requirement: Laboulaye: *Contes bleus*; George Sand: *La Mare au Diable*; Erckmann-Chatrian: *Le Trésor du vieux seigneur*; France: *Abeille*; Augier: *Le Gendre de M. Poirier*; Lavis: *Histoire de France*, cours moyen. (2) For the three unit requirement: Maupassant: *Contes Choisis*; Daudet: *Contes*; Mérimée: *Colomba*; France: *Le Livre de mon Ami*; Monro: *French Revolution Portraits* (Dutton). (3) For the four unit requirement: V. Hugo: *Les Misérables* or *Quatre-Vingt-Treize*; Musset: *Trois Comédies*; Loti: *Pêcheur d'Islande*; Fabre: *Les Merveilles de l'Instinct chez les Insectes* (Dutton); An anthology of French verse.

GERMAN (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in a document entitled "Definition of Requirements," published by the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) The books selected for class study should be thoroughly German in character and content. Intensive work on a comparatively small number of pages is preferred to a more superficial study of a larger number of pages. For the two unit requirement the number of pages read in class should, in general, not exceed 300; but in no case should the amount be less than 225 pages. Not more than 100 pages should be taken from readers arranged especially for beginners. For the three unit requirement not more than 600 pages in all (i.e., 300 in addition to the maximum amount for the two unit requirement) should, in general, be read; but never less than 500 pages. Not more than one work of the classical period of German Literature should be included. Besides this intensive reading some *rapid home reading* of easier texts (100 pages or more) is strongly urged. (2) The results desired can *not* be obtained if a considerable portion of the time is spent on translation from German into English, or vice versa. (3) Features that should not be neglected are—*a.* Vocabulary: the careful study of a goodly number of common words and expressions drawn chiefly from the texts read. *b.* Frequent practice in the oral and written use of the language *without the medium of English*. This should consist partly in answering in German questions put in German, based on the texts read intensively in class, partly in reproducing in German, without the aid of questions, the contents of these texts (*Freie Reproduktion*).

GREEK (2 or 3)

2 Unit Requirement.—During the two years the student should acquire a knowledge of the language sufficient to enable her (1) to translate at sight simple passages of Attic prose, and to answer questions on ordinary forms and constructions; (2) to translate into Greek a passage of connected English narrative, based on Xenophon; (3) to read Greek aloud with correct pronunciation and with full expression of the sense of the passage.

The prescribed study includes—(1) Grammar: inflections; the simpler rules for composition and derivation of words; use of cases; construction of sentences, with particular regard to the use and meanings of the moods. (2) Prose Composition: regular practice in writing or speaking Greek, with at least twenty written exercises, including some connected passages. (3) Three books of Xenophon's *Anabasis*, or its equivalent.

SUGGESTIONS CONCERNING PREPARATION.—The acquiring of a good working vocabulary should begin with the first lesson, and constant practice in the use of the more common words should be kept up throughout the course. The students should learn to recognize the words by hearing as well as by sight, and should be able to use them in speech as well as in writing. Writing Greek from dictation, learning short passages by heart, and putting simple English sentences into Greek orally, or answering in Greek simple questions asked in Greek serve not only to fix vocabulary and forms in the students' minds, but also to give them a feeling for the natural Greek form of expression.

3 Unit Requirement.—In addition to the preparation for the two unit requirement stated above, the student must be able to translate at sight a passage from Homer, to read it with a correct expression of the rhythm, and to answer a few questions on the Homeric forms and on the subject-matter.

The prescribed study includes: three books of Homer's *Iliad*; Prose Composition, continued practice in translation into Attic prose of connected passages of English.

ITALIAN (2, 3 or 4)

The requirements are stated in a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

To meet the two unit requirement the pupil should at the end of the first year be able to read simple Italian prose; to put into Italian simple English sentences taken from the language of every-day life or based upon a portion of the Italian text read; and to answer questions on the rudiments of the grammar, as defined below.

During the first year the work should comprise: (1) The rudiments of grammar, including the inflection of the regular and more common irregular verbs; the inflection of nouns, adjectives, participles and pronouns; the use of pronouns, adverbs, prepositions, and conjunctions and the elementary rules of syntax. (2) Written and oral exercises involving rules of grammar and forms of expression. (3) Careful drill in pronunciation. (4) Careful reading and accurate rendering of 100 duodecimo pages of graduated text. (5) Memorizing about 100 lines of poetry. (6) Writing Italian from dictation.

Suitable texts for the first year are: L. A. Wilkins and Santelli, *First Italian Reader*; Farina, *Fra le Corde di un Contrabasso*; E. H. Wilkins and Marinoni, *L'Italia*; Goldoni, *La Locandiera*.

During the second year the work should comprise: (1) More advanced grammar work with special stress on the irregular verb, the subjunctive mood, uses of tenses, and of the conjunctive pronouns. (2) Reading of

about 200 pages of modern prose in the form of stories and plays. (3) Compositions (15-20), translations and abstracts with constant application of rules of grammar. (4) Memorizing of simple poems. (5) Writing from dictation. (6) Frequent oral and written reports on reading or assigned subjects.

Suitable texts for the second year are: Stories, plays, and history by different authors; Goldoni, *Il Vero Amico*, *Un Curioso Accidente*, *Il Ventaglio*; Marinoni, *Italian Reader*; Pellico, *Le Mie Prigioni*; Ojetti, *Cose Viste*.

At the end of the third year the pupil should be able to read at sight ordinary Italian prose or simple poetry; to translate into Italian a connected passage of English based on the text read; and to answer questions involving a more thorough knowledge of syntax than is expected in the elementary course.

This should comprise the reading of about 300 pages of Italian of ordinary difficulty; practice in giving summaries in Italian of selected portions of the matter read; the discussion in Italian of the main facts of Italian history and customs for the study of which the teacher will provide the material; systematic review of grammar; and more advanced composition including free composition and the writing of social and commercial letters.

Suitable texts for the third year are: Bergen and Weston, *An Italian Reader of the 19th Century Literature*; Bowen, *Italian Reader*; Fogazzaro, *Peregrinatus*; Giacosa, *Una Partita a Scacchi*; Manzoni, *I Promessi Sposi*; E. H. Wilkins and R. Altrocchi, *Italian Short Stories*; Rovetta, *Romanticismo*; D'Annunzio, *Il Fuoco*; Vivanti, *Sua Altezza*.

For suggestions on the work of the fourth year consult a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

SPANISH (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in a document entitled "Definition of Requirements," published by the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) Grammar: verb drill; difference between *ser* and *estar*; use and position of pronouns; prepositions required with different verbs and adjectives; use of subjunctive and infinitive. (2) In reading, two ideas should be kept in mind: (a) accurate translation especially of idiomatic expressions; (b) a gradual development of the power to think in Spanish, by requiring the student to explain the meaning of words and phrases in

Spanish and give variations of text also in Spanish. (3) From the beginning the student should gradually become accustomed to the use of the spoken language in the class room, training the ear by means of short talks on different subjects given by the teacher, and the tongue by the different methods already suggested. Original work in composition should also be required.

The texts suggested for the two unit requirement are: A collection of short stories by different authors; a collection of brief comedies; a collection of easy lyrics (Spanish and Spanish-American) or of verse fables; a Spanish or Spanish-American historical reader; Alarcón, *El Capitán Veneno*; Carrión and Aza, *Zaragüeta*; Frontaura, *Las tiendas*; Quintana, *Vasco Núñez de Balboa*; Jorge Isaacs, *María*; Palacio Valdés, *José*; Mármol, *Amalia*. Two hundred pages of intensive reading during the first two years, with careful drill on construction, are preferred at this stage to 300 pages of "rapid reading."

The texts suggested for the three unit requirement are: Taboada, *Cuentos alegres*; Isla's version of the *Gil Blas*; Selgas, *La mariposa blanca*; Pérez Galdós, *Doña Perfecta*; Palacio Valdés, *La Hermana San Sulpicio*; a collection of essays dealing with Spanish or Spanish-American life and customs; Moratín, *El sí de las niñas*; Larra, *Partir a tiempo*; plays of the Alvarez Quintero brothers; plays of Benavente.

SCIENCE (1, 2 or 3)

One to three units of science may be offered from the following subjects: (1) Biology, (2) Botany, (3) Chemistry, (4) Geography, (5) Physics, (6) Zoology. The requirements in science are met by the courses outlined in a document entitled "Definition of Requirements," published by the College Entrance Examination Board. The requirement in Botany may also be met by covering the main features in the course outlined in the Laboratory Guide for the introductory course at Wellesley College. Copies of this guide may be secured if desired from the office of the Board of Admission, Wellesley College.

All students offering science for admission must submit certificates concerning the laboratory work in science. Blank forms for this purpose may be obtained either directly from the College Entrance Examination Board in New York or from the Board of Admission of Wellesley College. *Students are not required to submit laboratory notebooks for admission credit in science.*

MUSIC (1 or 2)

One unit of admission credit is granted in either Harmony or Appreciation.

Two units of admission credit are granted for either of the following combinations: I. Harmony and Practical Music; II. Appreciation and Practical Music.

No admission credit is given for Practical Music alone.

A. Harmony.—Students taking this examination must present, at the time of the examination, their harmony notebooks indorsed by their teachers. The examination will be adapted to the proficiency of those who have had one year's systematic training with at least five lessons a week or its equivalent. (It is understood that this work may be done in two or more years.) The candidate should have acquired:

(1) The ability to harmonize in four vocal parts simple melodies or basses of not fewer than eight measures in major and minor. These melodies and basses will require a knowledge of (a) triads and inversions, (b) diatonic seventh chords and inversions, (c) non-harmonic tones, (d) modulation, transient and complete, to nearly-related keys.

It is expected that systematic work in ear-training, involving the recognition of intervals (melodic and harmonic), melodies, and chords, has been done in connection with the above, and students will be examined in the same.

The ground covered by this examination is represented by the following textbooks. Goetschius: *The Theory and Practice of Tone Relations*, Chaps. I through XXI. Foote and Spalding: *Modern Harmony*, Chaps. I through XXI. Gehrken: *Music Notation and Terminology* is suggested for rudiments, and Wedge: *Ear-Training and Sight-Singing* for practice in the recognition of intervals and for melodic dictation. Material for practice in the recognition of chords may be found in any harmony textbook.

B. Appreciation.—It should be the purpose of this course (a) to provide suitable training to accompany the study of practical music during the preparatory years, (b) to prepare students for entering a course in elementary harmony, (c) to acquaint students with a small but representative literature of music and with some of the elements of musical form.

The course should cover the following:

(NOTE: It is suggested that the material outlined below under I and II be made *prerequisites* to the course, not included in it.)

I. Elements: names of the scale tones; scale formation, major and minor; key signatures; commonly used time signatures; commonly used marks of expression; chord formations including the dominant seventh.

II. Ear-training: recognition of major and minor scales and triads; recognition of all intervals in major and minor scales; recognition of plagal cadence, perfect cadence, half cadence, deceptive cadence; recognition of duple and triple meters and of rhythms characteristic of Waltz, Minuet, Mazurka, and Polonaise.

III. A study of the following forms: Simple Three-part song-form, Binary Form, Ternary Form, Rondo Form, Theme and Variation Form, Minuet and Trio Form.

In testing this knowledge, the student will be required to recognize the form of a composition upon hearing it played three times.

IV. Memory work. The examination will include a memory test of representative musical examples. A list of at least twenty examples chosen by the student (from the works suggested for use in appreciation courses by the music departments of the Four Eastern Women's Colleges*) must be presented to the examiner. The examination on this part of the work will be based on the list thus presented.

C. Practical Music.

PIANO. The candidate must be prepared to play for the examiners the following and no candidate will be examined who is not *ready to perform* these requirements: (1) Any scale (including major and all forms of minor) at metronome speed of four notes = 88. (2) Any two studies selected by the student from Czerny, Opus 261, Heller, Opus 45, or Le Couppey, Opus 20. (3) A Bach Two-Part Invention. (4) The first movement of a sonata by Haydn, Mozart, or Beethoven. (5) A piece of moderate length (which must be memorized) selected from the works of Schubert, Schumann, Mendelssohn, or Chopin. (6) Hymn tunes and simple pieces at sight.

VOICE. The candidate must be prepared to meet the following requirements: (1) To sing with good pitch and intonation, technical facility, correct phrasing, and musical interpretation not fewer than six of the following songs: Any song of MacDowell, Franz, Schubert, Schumann, or Brahms; Mozart's *Wiegenlied*, Grieg's *Mit einer Primula Veris* or *Der Schwan*; any of the Weckerlin bergerettes; any song from Schirmer's *Anthology of Italian Song*; or other songs with the approval of the Department. (2) To play simple accompaniments. (3) To sing at sight music of the type of folk songs, Brahms' *Wiegenlied*, Schubert's *Haiden Röslein*, and others.

VIOLIN. The candidate must be prepared to play: (1) Major and minor scales with good intonation. (2) Any two studies of the grade of

*A list of these compositions will be furnished on application to the Department of Music of Wellesley College.

Dont, Opus 38 or Mazas, Opus 36, Vol. I. (3) A sonata of Mozart, a sonatina of Schubert, or solo of moderate difficulty with correct phrasing and musical tone. (4) Simple pieces at sight.

BIBLICAL HISTORY (1)

A course such as the one outlined by a committee of the National Association of Biblical Instructors will meet the requirement. A statement of this course has been published in "Christian Education," March, 1928, pp. 385-392, and a reprint of this can be obtained from the Council of Church Boards of Education, 111 Fifth Ave., New York City.

ADMISSION TO ADVANCED STANDING

Terms of Admission

The number of students admitted to advanced standing in any year is limited and all entrance is on a competitive basis. If a student has maintained an excellent record in college, the Board of Admission would encourage her to apply for entrance with advanced standing credit, particularly if she has special interests which she can follow out at Wellesley College. For information about registration candidates should read page 20.

A candidate should show that she has covered the admission requirements for the freshman class of fifteen units of secondary school work (see page 26) and has completed at least a full year of highly satisfactory work at another college. She should be entitled to honorable dismissal from the college which she has attended and should be recommended by her instructors. The colleges and universities from which transfer can be made are those approved by the Association of American Universities.

Candidates admitted from accredited colleges will be required to register during the first year as Unclassified Students, unless they have met the examination requirements for entrance to the freshman class at Wellesley College. (See pages 21-25.) Residence of at least two years is required to obtain the B.A. degree, of which one must be the senior year. The work of these two years must include all the prescribed work (see pages 40, 41), not covered by the credentials submitted. The exact amount of credit given for work completed in another college will not be determined until after the first year of residence. The success with which advanced standing candidates carry the work of this year is a determining consideration in deciding credit.

The decision as to the successful applicants for admission to advanced standing will be made by the middle of July of the year in which entrance is desired.

Credentials

The following credentials must be in the hands of the Board of Admission before July 1 of the year in which entrance is desired:

1. Official statement of college credits, with dates of attendance, courses offered for credit, grades attained in each course, entrance credits, and honorable dismissal.
2. Official record of any entrance examinations which have been taken.
3. Copy of the catalogue of the college attended, with name of candidate, list of courses offered for credit, and page references.
4. Letter of recommendation from one of candidate's instructors and the Dean.
5. Health credentials.
6. Statement from candidate of her reasons for wishing to transfer to Wellesley College and of the subjects of her major interest.

Admission of Candidates for the M.A. and M.S. Degrees

Candidates for the degree of Master of Arts or Master of Science in Hygiene and Physical Education must be graduates of Wellesley College or of other institutions of satisfactory standing, and must present adequate credentials signifying their ability to carry on the work for the degree.

Application for admission as a graduate student in any department should be made upon a form which will be furnished by the Chairman of the Committee on Graduate Instruction on request. It is desirable that the application be sent by May first of the year in which the student proposes to enter. It should be accompanied (1) by the official record of admission subjects, college courses and grades, (2) by a copy of the catalogue of the institution attended, marked to indicate the courses taken, (3) if possible, by papers and reports of work.

A matriculation fee of five dollars is payable when a student is accepted as a candidate for the Master's degree. The amount of this fee will be deducted from the diploma fee of twenty-five dollars payable when the degree is received.

Graduate fellowships and scholarships are described on page 143.

A circular containing full information for graduate students will be sent on application to the Chairman of the Committee on Graduate Instruction. For requirements for the M.A. and M.S. degrees see page 44.

Admission of Students Not Candidates for a Degree

Candidates for the Certificate in Hygiene and Physical Education

A two years' course, especially designed for the training of teachers of hygiene and physical education, and leading to the certificate of the

Department of Hygiene and Physical Education, is offered to graduates of approved colleges who meet the requirements. Full information will be found on pages 100-104.

Correspondence should be addressed to the Chairman of the Committee on Graduate Instruction.

Candidates for Special Work in Other Departments

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Admission, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities for prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and attainment are not ordinarily admitted, but if such desire admission they must expect to meet by examination the requirements prescribed for admission to the freshman class, or a full equivalent for them, and to satisfy such additional requirements as are prescribed by the departments which they propose to enter. Specific statements of these requirements in Music will be found on page 121.

All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses will be granted a certificate.

As the capacity of halls of residence is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college houses.

Correspondence should be addressed to the Secretary to the Board of Admission.

Requirements for the B.A. Degree

Every candidate for the B.A. degree must complete before graduation the equivalent of sixty hours. First year French and first year German may not *both* be counted among the sixty hours. Neither first-year French nor first-year German may be so counted if taken after the sophomore year. Second-year French, second-year German, first-year Italian and first-year Spanish may not be counted among the sixty hours, if taken after the junior year. Of the sixty hours required for the B.A. degree, a certain number is prescribed, the rest elective.

II. ELECTIVE. All courses are classified in Grades I, II, III; Grade I including elementary courses and Grade III the most advanced courses. All of the sixty hours not indicated in the above are elective, subject to the approval of the Faculty with the following restrictions:

Every candidate for the B.A. degree must show before graduation that she has completed twenty-one hours of restricted elective work, as follows:

- (1) Twelve hours in one department
Nine hours in a second department,
or
- (2) Nine hours in one department
Nine hours in a second department
Three hours in a third department.

The three-hour elective is to be supplementary to the work of one of the departments in which nine hours are chosen;

or

*If a student fails to pass with credit in the second semester of English Composition 101, she will be required to take an additional semester course in the sophomore year.

†The hour in practical Hygiene and Physical Education is met by four periods in practical work, two periods per week in the freshman year and two in the sophomore year.

- (3) Twelve hours in one department
Six hours in a second department
Three hours in a third department.

The six-hour and three-hour electives are to be supplementary to the work of the department in which twelve hours are chosen;

or

- (4) Twelve hours in one department

Three courses (conceivably in different departments) supplementary to the twelve hours.

Of the courses offered to fulfill this requirement, at least one full course of Grade III must be taken in the senior year. Of the twenty-one hours required at least nine hours must be above Grade I and at least six hours must be of Grade III.

Every candidate for the B.A. degree must pass a General Examination in a major of nine or more hours in addition to the regular course examinations.

Standard for Graduation

Classes of 1931, 1932, 1933

A certain quality grade is required for graduation and for the purpose of determining this quality grade, numerical values called "points" are given to the grade letters as follows: for grade A, three points for each semester hour of the course in which the grade is received; for grade B, two points; for grade C, one point; for grade D (passing), no points; for a grade below D, one point is deducted. In order to be recommended for the degree of Bachelor of Arts a student must have obtained not less than nine quality points in the first semester of her freshman year and not less than twelve quality points in each succeeding semester. Deficiency of points in any semester may be made good only in accordance with regulations adopted by the Faculty. Students who are deficient in quality points at the end of the third year or otherwise not of diploma grade will not be permitted to continue.

Class of 1934 and Following Classes

A certain quality grade is required for graduation and for the purpose of determining this quality grade, numerical values called "points" are given to the grade letters as follows: for grade A, three points for each semester hour of the course in which the grade is received; for grade B, two points; for grade C, one point; for grade D (passing), no points; for a grade

below D, one point is deducted for each semester hour. In order to be recommended for the degree of Bachelor of Arts a student must in each semester attain as many quality points as the hours she carries, i.e., a C average. Deficiency of points in any semester may be made good only in accordance with regulations adopted by the Faculty. Students who are deficient in quality points at the end of the third year or otherwise not diploma grade will not be permitted to continue.

Honors in Subjects

Students who wish to become candidates for Honors may apply in the spring of their sophomore or junior year to the special committee appointed to consider these applications.

All applications from candidates for Honors in Subjects must be accompanied by recommendations from the instructors concerned.

A student electing to study for Honors in Subjects will choose a Field of Distinction and will work in that field under the special direction of one or more of the instructors concerned who will advise her on the possible development of her Field of Distinction and will guide her in the carrying on of independent work within it.

A candidate for Honors in Subjects must take all the prescribed work. In place of the regular restricted elective she must take at least twenty-one hours in the chosen Field of Distinction. This Field of Distinction includes work in the major department and allied courses, and with the approval of the major department directing the work may include not more than three hours of research independent of scheduled courses, thus giving the able student a stimulus to form habits of investigation in a manner to lead to advanced study.

Admission to Honors in Subjects will be confined to candidates whose scholarship, maturity and previous range of acquirement justify exceptional concentration. The work in the Field of Distinction for such a candidate will be subject to the following tests:

1. In general the regular tests of the courses in the Field of Distinction must be taken, including the examinations in these courses through the junior year.

2. A comprehensive examination must be taken in the student's Field of Distinction at the close of the senior year. This examination will take the place of the general examination required for seniors and will be in part or wholly oral.

Pre-Medical Course

The programme is based upon the requirements for admission to medical schools of Class A, but each student is advised to study carefully the requirement for the particular school which she has chosen.

Pre-medical students must meet the requirements for the degree as stated above under I Prescribed and II Elective.

These students may meet the restricted elective requirement, given under II, by a combination of nine hours in Chemistry and six hours in Physics and Zoology respectively. The following programme is arranged for such students to meet the science and language requirement.

<i>Freshman Year</i>	<i>Hours</i>	<i>Junior Year</i>	<i>Hours</i>
Chemistry	3	Chemistry or Zoology . . .	3
Zoology	3	Physics	3
At least a reading knowledge of French or German is required by medical schools.		<i>Senior Year</i>	<i>Hours</i>
<i>Sophomore Year</i>	<i>Hours</i>	Zoology or Chemistry . . .	3
Chemistry	3	Additional Science . . .	3
Physics	3	since certain Class A medical schools require it.	
		The senior programme must include at least one course of Grade III, preferably in science.	

General Instructions

The programme in the freshman year is as follows:—

English Composition 101	3 hours
Hygiene and Physical Education 120	1 hour
Hygiene and Physical Education 121	½ "
*Courses open to choice	12 hours
<hr/>	
Total	16½ hours

The courses must be chosen in accordance with the prerequisites given

*In considering the *prescribed subjects* open to choice (see page 40), the following should be noted. If Mathematics is chosen it is advisable that it be taken in the freshman year. Philosophy and Psychology are not open to students below sophomore rank, but if chosen should preferably be taken in the sophomore year. It is advisable that either a science or language be taken in the freshman year.

in the department statements from the list of courses named below, with the advice that the choice should not include:

- (1) Two beginning courses in modern language.

Requirements for the M.A. and M.S. Degrees

Wellesley College offers graduate work leading to the degrees of Master of Arts, and Master of Science in Hygiene and Physical Education. The work required of a candidate is considered to be the equivalent of twelve hours of college work and may be done in one subject or two related subjects. The programme includes, in general, no fewer than two full courses of Grade III or their equivalents in the major subject, and may include a thesis embodying the results of original research, or a report or

reports based on independent work. A candidate for either degree is required to have a working knowledge of either French or German, to be tested by examination *at entrance*. Individual departments may require a second language. At least one year of graduate study is required of all candidates, but more time may be needed for the completion of the work. One year *in residence* is required of all candidates except graduates of Wellesley College who have done the work at some institution which does not grant a Master's degree to women.

Information regarding theses, final examinations, etc., will be found in the Graduate Circular which will be sent on application to the Chairman of the Committee on Graduate Instruction.

Modern methods of combating plant diseases are briefly considered from the standpoint of the principles that underlie them.

Open to juniors and seniors who have completed three year-hours of grade II. Six periods a week, in general, two of lecture and discussion and four of laboratory and field, counting three hours a week for the second semester.

MISS HOWARD.

305. **ECOLOGY.** (Not offered in 1930-31.)

306. **PHYSIOLOGY.** Experiments, lectures, discussions, and readings designed to acquaint the student with the higher plants as working organisms. The experiments embody problems in, to a greater extent than demonstrations of, the fundamental activities of the higher plants in relation to their environment. It is planned that increased precision in laboratory manipulation shall keep pace with the student's growing knowledge of physiological methods.

Open to juniors and seniors who have completed six year-hours of Botany in college and who have completed or are taking a year of either Chemistry or Physics. Six periods a week, in general, two of lecture and four of discussion and laboratory, counting three hours a week for a year.

The Wellesley College Choir of eighty members, founded in 1900, furnishes the music for the Sunday services in the Memorial Chapel and gives two or more secular concerts during the year. Any student with a good natural voice is eligible for membership; trials to fill vacancies are held at the opening of each college year.

The College Symphony Orchestra, consisting of about thirty student and faculty members, was founded in 1906. It offers advantages of competent instruction in ensemble playing under a professional conductor. It gives at least one concert each year. Any members of the College who have sufficient technique are admitted to membership.

A limited number of tickets for reserved seats at the concerts of the Boston Symphony Orchestra in Symphony Hall, Boston, is free to students in the department who are able to use them profitably.

II. Practical Music (Instrumental and Vocal Lessons)

INSTRUCTORS IN PRACTICAL MUSIC: CLARENCE GRANT HAMILTON, M.A. (PIANO).
EMILY JOSEPHINE HURD (PIANO).
HO ARD HINNERS, B.A. (ORGAN).
BLANCHE FRANCIS BROCKLEBANK (PIANO).
JEAN EVELYN WILDER, B.A. (PIANO).
JACQUES HOFFMANN (VIOLIN).
JEAN HASTINGS MACDONALD (VOICE).

Attention is called to the fact that a student need not necessarily spend five years in college in order to carry on practical music at the same time with the academic course. See (a) following.

It is believed that students having a command of piano or organ technique will be able to profit by the theoretical instruction given in the department to a fuller degree than those without such a technique. To encourage students to acquire a technique, as well as to furnish authoritative instruction, the department undertakes to give lessons in piano, organ, and violin playing, and in singing. Attention is called to the fact that students who elect Musical Theory 103 are thereby obtaining one hour's credit toward the B.A. degree in connection with work done in practical music. This work is offered to all students, whether candidates for degrees or not, as stated below:—

(a) *Candidates for the B.A. degree who propose to spend but four years in college may take practical music, provided that they obtain each year the permission of the Dean as well as of the Chairman of the De-*

partment. They must also take a full course in Musical Theory, unless they have completed two three-hour courses in the subject.

(b) Candidates for the B.A. degree *who are willing to devote five years to the college course* will be permitted to take practical music each year of the course, governed by the restriction laid down in (a).

(c) Candidates for the B.A. degree who wish also the *Certificate of the Department of Music* should plan to devote *five years to the college course*. Such students are required to take practical music, two lessons a week throughout the five years. They must complete, satisfactorily to the department, a course in the literature of the instrument chosen or of the voice; they must apply for the certificate at least three years in advance. The study of Musical Theory is required throughout the course.

(d) Students not candidates for the B.A. degree *who desire to specialize in music* must meet the requirements prescribed for admission to the freshman class, and must in addition pass an entrance examination in Harmony. Special students must take both Musical Theory and vocal or instrumental lessons, two a week, with not less than twelve hours of weekly practice. They must also take from six to nine hours per week of academic work, including Musical Theory, as may be decided in consultation with the Dean.

(e) Students not candidates for the B.A. degree who wish the *Certificate of the Department of Music* must comply with the conditions laid down in (d); moreover, the academic work taken must include modern languages. Such students must apply for the certificate on entering the department, and must have already acquired the fundamental technique of the instrument chosen or of the voice. The time occupied in study for the certificate depends upon the talent, upon the proficiency of the student at entrance, and upon her subsequent diligence; but in general four years at least are necessary. The various courses are so arranged that the pupil on completion will have an acquaintance with the best musical literature.

(f) Graduates of Wellesley College or of similar institutions may make special arrangement for instrumental or vocal lessons.

(g) Permission to practice in Music Hall cannot be given to students not regularly registered in the department.

(h) Students whose progress is not satisfactory may be required to discontinue their lessons.

FELLOWSHIPS AND SCHOLARSHIPS

A. For Graduates

THE ALICE FREEMAN PALMER FELLOWSHIP, yielding an income of about \$1,600, was founded in 1903, by Mrs. David P. Kimball.

The holder of this fellowship must be a graduate of Wellesley College or of some other American college of approved standing, a young woman of good health, not more than twenty-six years of age at the time of her appointment, unmarried throughout the whole of her tenure, and as free

as possible from other responsibilities. The same person will not be eligible to the fellowship for more than two years.

The fellowship may be used for study abroad, for study at any American college or university, or privately for independent research. Several times during the period of tenure the holder of the fellowship must furnish evidence that it is used for purposes of serious study and not for general culture; and within three years from entrance on the fellowship she must present to the faculty a thesis embodying the results of the research carried on during the period of tenure.

Applications for this fellowship should be received by the President of Wellesley College not later than February first of the academic year preceding that for which the fellowship is asked. Forms to be used in making application may be obtained from the Office of the President, Wellesley College. These applications must be accompanied by theses or papers presenting evidence of the most advanced work of the candidates, since the fellowship is not assigned on the basis of unsupported credentials, however commendatory.

FANNY BULLOCK WORKMAN SCHOLARSHIP, yielding an income of about \$1350, was founded in 1929 by the bequest of Mrs. Fanny Bullock Workman.

The holder of this scholarship shall be a woman holding a degree from Wellesley College. She shall present evidence of (a) good health, (b) character, (c) financial need, and (d) ability; and shall be free from personal obligation which would interfere with study. The scholarship may be used to assist preparation for "any useful work." Twice during the period of tenure the holder of the scholarship shall furnish evidence of work done; and not later than one year after the completion of the period, a full report or other suitable evidence of the use to which the scholarship has been applied shall be presented.

The application for this scholarship should be received by the President of Wellesley College not later than February first of the academic year preceding that for which the scholarship is asked. A form to be used in making application may be obtained from the Office of the President, Wellesley College. The application must be accompanied by evidence of the most advanced work of the candidate in her chosen field.

THE HORTON-HALLOWELL FELLOWSHIP has been established by the Alumnae Association of Wellesley College in honor of Mary E. Horton, the first professor of Greek, and Susan M. Hallowell, the first professor of Botany. It is open to alumnae of Wellesley College for graduate study in candidacy for the degree of Doctor of Philosophy or for private research of equivalent standard. The amount of the fellowship for 1931-1932 will be \$1250.

Application should be made by letter from the candidate to the Fellowship Committee of the Alumnae Association making the award. The applicant should describe fully the plan of study which she proposes to follow if granted the fellowship, and her preparation for this work. The letter should be accompanied by such specimens of the written work of the candidate as may best demonstrate her ability to carry on independent study in her chosen field. Before making formal application the candidate should obtain more detailed information from the committee.

Applications should be received before February fifteenth of the year preceding that for which the fellowship is desired. All communications regarding the fellowship should be addressed to the Chairman of the Fellowship Committee, Alumnae Office, Wellesley College.

RESEARCH FELLOWSHIP FOR THE STUDY OF ORTHOPEDICS IN RELATION TO HYGIENE AND PHYSICAL EDUCATION, yielding \$1000.

The general requirements to be met by applicants are as follows:—good health; the bachelor's degree from a college or university of good standing; sound preparation in chemistry, physics, and biology; special preparation in anatomy, kinesiology, and physiology; familiarity with the elements of orthopedic theory and practice; and an insight into some one or more of the problems of orthopedics as related to hygiene and physical education.

The work on the problem chosen in consultation with the department must be done in residence at Wellesley College. It will, in general, begin in the September following the acceptance of the applicant, and will continue through one calendar year. It will involve kinesiology, applied physiology, and the study of clinical material. For the latter, opportunity will be provided to study the work of orthopedic surgeons in Boston and other eastern cities. The results of the investigation are to be embodied in a thesis to be submitted to the department and published.

Applications for this fellowship should be received by the Director, Department of Hygiene and Physical Education, Wellesley College, not later than March first of the academic year preceding that for which the fellowship is asked. The decision reached by the department will be based upon the applicant's record, upon personal correspondence, and, when possible, upon personal interviews.

THE LORETTA FISH CARNEY MEMORIAL SCHOLARSHIP of \$1,200 was founded in 1920 by the alumnae and staff of the Boston Normal School of Gymnastics and the Department of Hygiene and Physical Education of Wellesley College, the income of this fund to be awarded to a senior in the department at the discretion of the teaching staff of the department and of the President of the College.

THE AMY MORRIS HOMANS SCHOLARSHIP FUND of \$6,700 was founded in 1924 by the Mary Hemenway Alumnae Association of the Graduate Department of Hygiene and Physical Education in honor of Miss Amy Morris Homans, pioneer and leader in physical education in the United States, the income of this fund to be awarded to a student in the Graduate Department of Hygiene and Physical Education who is in need of assistance and shows proficiency and promise.

THE TRUSTEE GRADUATE SCHOLARSHIPS. Two scholarships yielding an income of \$750 each were established by the Trustees of Wellesley College in 1927 for members of the senior class who are qualified for graduate work. The scholarships may be used for study in this country or abroad. Notice of the conditions of application are sent in the spring of each year to qualified seniors by the Chairman of the Committee on Graduate Instruction.

EIGHTEEN GRADUATE SCHOLARSHIPS of the annual value of one year's tuition, have been established for the benefit of approved candidates for the Master's degree in residence at Wellesley College. Application for one of these scholarships should be made by personal letter from the candidate to the Chairman of the Committee on Graduate Instruction, Wellesley College, stating the applicant's reasons for desiring to do graduate work in the department chosen, and her reason for applying for the scholarship. The award will be made after the candidate's formal application for admission to graduate work has been accepted.

Laboratory assistants and others members of the official staff of the College are granted the privileges of graduate study without tuition charge.

GRADUATE STUDY IN CLASSICS:—

The American School of Classical Studies in Athens offers special opportunity for graduate study in Greek. Membership without tuition*, is open to all graduates and graduate students of Wellesley College who have done sufficient work in Greek and Archaeology to profit by the opportunity. The object of the School is to furnish an opportunity to study in Greece the literature, art, antiquities, and history of the country under suitable guidance; to prosecute and to aid original research in these subjects; and to assist in the exploration and excavation of classic sites. Three fellowships of \$1000 each are awarded annually on the basis of competitive examinations and are open to graduates of the co-operating colleges of which Wellesley College is one. For further information apply to Professor Walton.

study of classical literature in its bearing upon antiquities and history; of classical, Etruscan, and Italian art and archaeology, including topography, palaeography, and epigraphy, and of the art and archaeology of the early Christian, Mediaeval, and Renaissance periods within the boundaries of Italy. It furnishes regular instruction and guidance in some or all of these subjects, encourages and assists in original research and exploration. Students should have the ability to read ordinary Greek and Latin prose at sight and to use French and German as instruments of research; they will find an elementary knowledge of Italian very useful. Those admitted are expected to put themselves under the guidance of the Director of the Academy and the Professor in charge of the Classical School for the full period of eight months. Duly qualified graduates of Wellesley College are exempt from any charge for tuition. Three Fellowships in the School of Classical Studies are offered by the Academy, each with a stipend of \$1500 a year for two years, and an allowance of \$500 for transportation to and from Rome. The academic year begins on the first day of October and students are expected to report in Rome at the Academy on that day. A Summer School established in 1923 offers a programme of great value for students and teachers of the classics. For further information application may be made to Professor Walton.

SCHOLARSHIPS IN THE MARINE BIOLOGICAL LABORATORY AT WOODS HOLE.

—Admission to courses at Woods Hole is upon a selective basis. Wellesley College offers annually two scholarships to applicants who are successful candidates. This laboratory is primarily for research, but in the summer courses of instruction are offered, four in Zoology and one in Botany. The purpose of these courses is to aid in the production and training of investigators, and first consideration is given to persons who, whether graduate or undergraduate, give promise of contributing to the advancement of science. Applicants must have completed at least two full college courses in the subject in which they wish to work. The laboratory offers, besides these courses of instruction, opportunity for research, either under direction or independent. In addition, there are courses of lectures on special topics and on subjects of general biological interest.

Applicants should state the character of the work to be done, whether botanical or zoological, whether courses of instruction are desired, or investigation under direction. All applications should be sent to Professor Ferguson or Professor Moody in time to reach Wellesley College before April first. These applications will be forwarded to Woods Hole to be acted upon May fifteenth; after this date notification will be sent to the successful candidates.

B. For Undergraduates

The scholarships listed are awarded in recognition of genuine pecuniary need and of satisfactory character, college citizenship, health, and intellectual and practical ability as tested by a year or more of life and study at Wellesley College. The foundations are of varying amounts, and the income is apportioned as justly as possible according to need and merit. No scholarship award covers the full amount required for both tuition and residence on the ordinary plan. These scholarships are intended primarily for students who have completed one or more years' work at Wellesley College. Provision for new students and additional provision for other students have been made as indicated below.

Beginning with the academic year 1926-27 the Trustees set aside annually a sum for the aid of students of recognized intellectual ability who are financially unable to meet the charges for tuition and residence. The scholarships vary from \$100 to \$300 with occasional exceptions, and are awarded on the basis of merit with due consideration to need, scholarship attainment, and personal qualities. *Applications from new students* for scholarships should be made to the Dean of Freshmen before March first of the year of admission.

Competitive Scholarships for Freshmen. Six competitive scholarships for one year's tuition, \$400, are to be awarded annually on the basis of entrance examinations to members of the freshman class needing financial assistance. One of these scholarships will be given to the freshman who has made the highest average grade in her entrance examinations. The other five scholarships will be assigned by districts in the following divisions of states: New England, Middle Atlantic, Southern, Middle Western, and Far Western. In each district the freshman making the highest examination grade will ordinarily receive the award, but if no student attains a sufficiently high average, the award will not be made. Applications for these competitive scholarships should be made to the Dean of Freshmen before March first of the year of admission.

Applications from students in college must be filed with the Chairman of the Faculty Committee on Scholarships before March first on forms furnished for the purpose and in accordance with instructions posted in February of each year.

Two co-operative houses are open to self-helping students but are not of sufficient capacity to provide for freshmen applicants. A system of student waitresses is also in operation, and freshmen can often avail themselves of the opportunity of self-help thus afforded.

The Personnel Bureau is actively engaged in bringing students into connection with work to be done for compensation within the College and in the neighborhood, but such employment, since it makes a distinct draft upon strength and time, is hardly to be advised for the freshman year.

Another source of pecuniary aid is in the work of the Students' Aid Society established by the founders of Wellesley College and revived and incorporated by the alumnae of the College in April, 1916. Distributions are made both in gifts and in loans without interest. The existing funds are not sufficient for the work in behalf of students which the Society aims to do, and contributions of any amount will be gladly received by the treasurer of the Society, Miss Ruby Willis, care of Wellesley College.

PERSONNEL BUREAU

The staff of the Personnel Bureau consists of a Director, a Consultant, a Faculty Associate, an Associate, an Appointment Secretary, and two assistants.

The Personnel Bureau is a central depository of the individual histories of the students as collected from the records of grades, from interviews, personality ratings from the faculty, mental tests, health reports, and extra-curricular activities, and is maintained for furnishing material of value in educational and vocational advising. The Bureau is in active co-operation with other administrative offices by means of the Personnel Board. This is composed of the President of the College, the Deans, the Recorder, the Health Officer, the Resident Physician, the Professor of Psychology, and the Director of the Personnel Bureau. Meetings are held from time to time for the consideration of personnel questions and methods of procedure.

The Personnel Bureau, established by the Founder as the Teachers' Registry, includes also in its scope the placement of graduates not only in teaching, but in business positions, and the work of the Committee on Vocational Information, which arranges lectures and discussions on occupations. Registration for placement is open to all who have taken courses in Wellesley College, and seniors are invited to register during their residence at the College. The Bureau maintains files, collects credentials, and is the source of information concerning the vocational equipment and experience of Wellesley women. The registration fee is \$2.00, for life membership, and no commission is charged on salaries. The Bureau also registers undergraduates and alumnae for summer work, and has charge of undergraduate employment.

EQUIPMENT

Founders Hall, a building for lecture rooms and department offices pertaining to instruction in the Liberal Arts, was opened for use in September, 1919. The hall was built from the Restoration Fund, secured for the College through trustees, faculty, alumnae, and other friends, and replaces in some part College Hall, the first and main building of the College, destroyed by fire, March 17, 1914. The building is dedicated as a memorial to the Founders of the College, Henry Fowle Durant and his wife, Pauline Adeline Durant.

Founders Hall is the first achieved member of a group of academic buildings to be completed as soon as funds allow.

Hetty H. R. Green Hall, the second building of this group now under construction will contain offices for the President and other officers of administration. It is expected that it will be ready for use in February, 1931.

The Library of the College, endowed by Eben Norton Horsford, now numbers over 135,000 bound volumes, including the departmental libraries. The books in the General Library building form a collection chosen primarily for the use of students and instructors in the college courses in Literature and Languages, History, Economics, Sociology, Philosophy, Education, Religious History and certain of the sciences. The General Library is open on week days from 8:10 A.M. to 9:30 P.M., and on Sundays from 2:30 to 5:30 P.M. Students have direct access to the shelves. The Library is catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided; special effort is made to train students in methods of research.

The Library subscribes for about five hundred American and foreign periodicals, including daily newspapers representing different sections of the United States, besides representative British and Continental dailies.

The Library has also many special collections of great interest and value to the student doing graduate or other research work. Among the most valuable of these are the Plimpton Collection, established by Mr. George A. Plimpton in memory of his wife, Frances Pearsons Plimpton, of the class of 1884, which comprises 1035 volumes of Italian books and manuscripts chiefly of the Renaissance; the Ruskin Collection, the gift of Mr. Charles E. Goodspeed; and the Collection of Early and Rare Editions of English Poetry given for the most part by Professor George Herbert Palmer.

The Brooks Memorial Room, opened in 1921, provides comfortable and beautiful surroundings with carefully selected books for leisure hours of reading.

The following departmental libraries are located in the buildings of the respective departments: Art, Astronomy, Botany, Chemistry, Hygiene and Music.

Farnsworth Art Museum.—The Farnsworth Art building was the gift of the late Isaac D. Farnsworth in 1889. It contains lecture rooms and exhibition galleries and is used by the Department of Art for its library, study rooms and studios.

Through the active interest of friends of the College, the Museum contains a representative selection of Egyptian minor arts, the M. Day Kimball collection of antique sculpture; examples of early Italian painting; a valuable early 16th century tapestry; a unique collection of primitive Indian baskets; the beginnings of a collection of English and Colonial em-

broidery and ceramics; a few modern paintings, including an important early Corot, an attributed Morland, and the Cumæan Sibyl by Elihu Vedder.

Further information may be found in the Art Museum Bulletin.

Music Hall and Billings Hall are large brick buildings, devoted to the department of Music. Music Hall contains offices, studios, and practice rooms equipped with thirty-seven new pianos of standard makes, a victrola, a Duo-art and a player-piano; also a large room, containing a two-manual pipe organ for the use of the organ pupils. Billings Hall, opened in 1904, contains the offices of the Professor of Music and the Assistant, the library and class rooms for instruction in Musical Theory; also a concert room, seating four hundred and ten people, containing an Ampico, a victrola, and the Grover organ,—a large three-manual organ, rebuilt and modernized by the Estey Organ Company.

The Music Library includes a collection of manuscripts, about three hundred scores (Symphony, Opera, Oratorio, and Cantata), two hundred songs, four hundred piano compositions and arrangements (two, four, and eight hands), besides one thousand reference books on musical subjects, and ten periodicals. The department owns about two hundred records for the victrola and four hundred and fifty records for the mechanical pianos.

Laboratories and Scientific Collections

Astronomy.—The Whitin Observatory is a one-story building of brick, faced with white marble, situated on a small hill on the college grounds, and devoted entirely to the use of the department of Astronomy. It contains two rooms surmounted by rotating domes, twenty-five feet and twelve and one-half feet in diameter respectively; a transit room; a spectroscopic laboratory; a large, well-lighted room for elementary laboratory work; and another large room in which is kept the department library. In the larger dome room is mounted a twelve-inch Clark equatorial refracting telescope, which is provided with a filar micrometer, a polarizing photometer, and an attachment for photographing the moon. The smaller dome contains a six-inch Clark refractor, which is provided with an electric driving clock, a filar micrometer, a wedge photometer, and an Evershed protuberance spectroscope, and which may be used as a guiding telescope for a small photographic camera. Both domes are rotated by electric motors. In the transit room is mounted a Bamberg prismatic transit of three inches aperture. A four-inch telescope with objective by Browning is mounted in a south wall of the building, with the eye end inside and the optic axis parallel to the axis of the Earth; a plane mirror beneath the object-glass reflects into the latter the light of the object observed.

In the spectroscopic laboratory is a Rowland concave grating spectroscope of six feet focal length. The Observatory is supplied with two Howard sidereal clocks, a Bond mean-time chronometer, and two chronographs, any of which may be connected electrically through a switch-board with keys near the various telescopes; a Berger surveyor's transit; a 60-mm. Zeiss tripod telescope; a Monroe calculating machine; a Gaertner comparator for measuring spectrograms; a projecting lantern and about 1200 astronomical lantern slides; and a large collection of illustrative apparatus and photographs. A flat portion of the roof of the neighboring Botany Building is fitted with illuminated desks for the use of astronomy students in naked-eye study of the sky.

Observatory House, the residence of the Director of the Observatory, is near by. Both the Observatory and the house, and also the greater part of the astronomical equipment, are the gift of the late Mrs. John C. Whitin.

Botany.—The department of Botany has a modern building with laboratories, research rooms, offices, etc., fully equipped for general and special work. Connecting with the building at three points is a range of modern greenhouses consisting of a large palm house and fourteen smaller houses.

The illustrative collections comprise an herbarium of some seventy thousand sheets, a working museum of more than five thousand specimens, and a large collection of lantern slides and microscopic mounts. The department has an "Outdoor Laboratory" for the use of certain courses. The greenhouses contribute to all the courses in the department, but are of especial importance in connection with the work in landscape gardening, physiology, ecology, taxonomy and genetics. The native flora about Wellesley is easily accessible, furnishing a convenient field for both the taxonomist and ecologist. The Susan M. Hallowell Memorial Library is exceptionally well supplied with reference works and with current periodicals.

Chemistry.—The department of Chemistry occupies a separate but temporary building which contains two lecture rooms and the chemical library in addition to separate, well-equipped laboratories for work in general chemistry, qualitative and quantitative analysis, organic chemistry, food and physiological chemistry, and physical chemistry.

The tables in the lecture rooms are equipped with hot and cold water, gas, compressed air, and both direct and alternating current. There is also available for use in lecture demonstration a comprehensive group of apparatus for special experiments. A Bausch and Lomb Balopticon for both lantern slide and opaque projection has recently been added as an important adjunct to the lecture equipment.

An electric still keeps the analytical laboratories on both floors supplied with distilled water. The work in qualitative analysis has been greatly

facilitated by the installation of a tank of liquid hydrogen sulphide outside the building. From this tank the gas is piped to the hoods in both the qualitative and quantitative laboratories. The quantitative laboratory is the most recent addition to the building. It is fitted with metal desks with alberene tops. These desks were especially designed for the particular apparatus used in such work.

Geology and Geography.—The department of Geology and Geography has a large and well-equipped lecture hall provided with a Leitz epidiascope for lantern slide and opaque projection, a good sized class room, and two laboratories, one for the use of geography classes, the other for work in geology.

The Geology Museum contains a typical college collection of dynamical, structural, and historical geology specimens,—a systematic collection of minerals arranged according to Dana, and a systematic collection of rocks. There are three collections arranged for classroom use,—one each in mineralogy, petrology and structural and historical geology. These collections are all the generous gifts of colleges, museums, and friends. The department has two noteworthy collections. The first is the Horace I. Johnson Mineral Collection, which consists of five thousand valuable and beautiful mineral specimens, including many precious metals and stones. This collection is the gift of the late Mr. John Merton, and was presented through the Class of 1915 by the courtesy of Miss M. Helen Merton. The second is the Reverend David F. Pierce Collection, which includes a complete and rare collection of building and ornamental stones and many precious and semi-precious minerals. This collection is the gift of Professor Frederick E. Pierce of Yale, Miss Anna H. Pierce, and Miss Mary E. Pierce of the Class of 1898. The maps of the department include wall maps of different countries and sections of countries; all the United States Geologic Folios, sixty United States Coast and Geodetic Survey maps, and ten thousand topographic maps of the United States Geologic Survey. Five thousand of these latter maps are arranged in groups to illustrate physiographic types. The department has four thousand lantern slides which illustrate all phases of geology and geography.

Hygiene and Physical Education.—The Department of Hygiene and Physical Education occupies Mary Hemenway Hall on the western border of the college grounds. The equipment of the department is designed for the application of modern science to the maintenance and promotion of health and for education through motor activity.

Mary Hemenway Hall includes a large well-lighted gymnasium with ample bathing facilities, administrative offices, class rooms, and laboratories for anatomy, physiology, hygiene, anthropometry, corrective exercise and research.

Unusual facilities for outdoor activities are provided as follows: one four-target archery range, two volley ball, four basket ball, and twenty-two tennis courts; one baseball diamond, two hockey and lacrosse fields, one 100-yard straight-away track and jumping pits; and a nine-hole golf course. Bridle paths are available for horseback riding. Close by, on Lake Waban, are two boathouses, with canoes, eight-oared shells, and motor boat for coaching and safety patrol. The Lake provides opportunity for swimming in the spring and fall terms, and for skating in the winter. The campus is well adapted to skiing, snowshoeing, and coasting.

The department library in Mary Hemenway Hall contains 3,600 volumes, a collection of valuable pamphlets, and regularly receives 45 journals dealing with matters related to hygiene and physical education.

Mathematics.—The department has a collection of 45 Brill-Schilling models of surfaces, chiefly of the second and third orders, beside several simple models, including some made by its members. There is a fine transit for the use of classes in Trigonometry, and an adding machine, used in the classes in Statistics.

Physics.—The department of physics occupies as temporary quarters two floors in an old building. There are two lecture rooms, fitted with direct and alternating current and gas, and laboratories for general physics, electricity, heat and light. The equipment is thoroughly modern. The lecture apparatus is sufficient to permit a wide range of experimental lectures. In the elementary laboratory, duplication of apparatus permits a close co-ordination between lectures and laboratory exercises. The equipment for advanced laboratory work is especially strong in electrical and optical apparatus. It includes an unusual equipment for experiments in electromagnetic waves and radio communication; a Hilger quartz spectrograph and constant deviation spectrometer; a Weiss electromagnet, etc.

There is connected with the laboratory a machine shop in charge of a mechanic who makes and repairs apparatus as needed.

Psychology.—The laboratory is housed in a building which is located in a quiet spot and which contains fourteen rooms with good electrical connections. Two dark rooms and a workshop are included. The equipment is adequate for demonstration, for general experimental work, and for many lines of research.

Zoology.—The department of Zoology is housed in a temporary building. This building contains laboratories for the elementary course in zoology, for histology and embryology and for physiology. The courses in anatomy are conducted in the laboratories in Mary Hemenway Hall. The

equipment lost in the fire of March, 1914, is being replaced as rapidly as conditions permit. The fundamental needs of the various courses have been met, and the physiology laboratory in the new wing is fully equipped with modern apparatus. The nucleus of a new museum has been formed, and additions are being made as fast as funds and the lack of adequate fire-proof space allow. A collection of New England birds, and a valuable collection of shells, the gift of Mrs. Rebecca S. Beaman, of Cambridge, are housed in a basement room of the Library.

HONOR SCHOLARSHIPS

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of two and one-half years' work, to juniors on the basis of one and one-half years' work. The standard in each case is absolute, not competitive.
